

# Form3 Exercise: Payments API

## Design Document

### Summary

The API service will be a Go binary, built to run in a docker container. It will back onto a PostgreSQL database. The database schema will be dictated by the Go structs which themselves will be put together based on the example data provided.

### Routes

Method	URL	Request Body	Response Body
GET	/v1/payments	-	List of payments
GET	/v1/payments/{id}	-	Single payment
POST	/v1/payments	Single payment	-
PUT	/v1/payments/{id}	Single payment	-
DELETE	/v1/payments/{id}	-	-
